1. Applicant is requested to provide in the specification the heading, such as "background of the invention", "summary of the invention", "detailed description of the invention", etc. to render the specification in a better format.
2. The specification is objected to under 35 U.S.C. 112, 1st paragraph in that in the junction paragraph between pages 4 and 5, it is not clear what the "area-measured elements" and "disk-shaped elements" are referred to.
3. Claims 14-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 14, line 1, the expression of "in particular a gas turbine component" is deemed to be indefinite in that it is not clear what scope is claimed. In claim 19, last two lines, the meaning is not clear. In claims 22 and 23, it is not clear what specific structure of "flow-optimized geometry" is claimed.

4. Claims 14-24 contain allowable subject matter and will be allowed upon the objection to the specification and the rejection to the claims are overcome.
5. US 5,348,595 and US 2004/0235136 are cited to show the state of the art.
